Forecast for Thursday 05 Nov 2020

Weather: Western and northern ranges rather cloudy with patchy light rain and drizzle, this most persistent across coastal ranges. Best chance of dry and brighter conditions expected towards the Great Glen, particularly either side of mid-day. Cloud thickening late evening with the patchy rain extending more readily eastwards.

Chance of cloud free mountain/hill tops above 800m: By day ranging from 20% or less in west and 50% towards the Great Glen, with bases quite extensive from 450-600m, and broken from 700-900m respectively.

Visibility: Good lowering to a handful of kilometres in rain, less in hill fog and drizzle.

Met Office Aberdeen Meteorologist's View

Most hazardous conditions in west with most extensive hill fog, chance of summit gales and a significant wind chill effect.

Forecast for Friday 06 Nov 2020

Weather: Similar to Thursday for the morning and early afternoon with skies cloudy to overcast in the west bringing occasional light rain, drizzle and quite extensive hill fog, while peaks around the Great Glen see the best of the shelter and limited brighter spells. Gradually conditions improving from the south from mid-afternoon with clouds lifting and breaking bringing a dry and clear end to the day.

Maximum wind: Beginning southwest 15-20mph with gusts reaching 35mph across most exposed ridges and summits, easing a touch during the afternoon.

Chance of cloud free mountain/hill tops above 800m: Initially ranging from 20% or less in west and 50% towards the Great Glen, with bases quite extensive from 450-600m, and broken from 700-900m respectively. Becoming by evening 90% for all as bases lift and break from south.

Visibility: Good lowering to a handful of kilometres in rain, less in hill fog and drizzle.

Temperature: **Glens:** Plus 5 Celsius increasing 11 Celsius during the afternoon
At 800m: Plus 2-4 Celsius
Freezing level: Above all summits, lowering 1200m late evening
